

# Professional development plan

Development goals	
1.	I need to become a trained pharmacist vaccinator in order to provide this service at my pharmacy
2.	I need to be trained to dispense Thalidomide and Lenalidomide which are commonly dispensed medications at my pharmacy (i-access program)

Add additional lines if required

My development goal			
1. I need to become a trained pharmacist vaccinator in order to provide this service at my pharmacy			
How have I identified this area / why is it important (Optional)			
The vaccination service is offered by my pharmacy. It is important now more than ever to become a trained pharmacist vaccinator due to the COVID pandemic.			
Actions I will take	Resources / support	Timescales	Feedback / comments on progress
<p>What will I do to develop the behaviour, attitude, knowledge or skill? Consider workplace learning, what coaching might be valuable as well as courses or study</p>	<p>What resources will I need to do this? (\$, time, access to other people)</p>	<p>When do I want to have this done by?</p>	<p>What progress have I made? You may wish to date these and include any examples from your practice or a reflection on your learning</p>
<ul style="list-style-type: none"> <li>Register with IMAC and book the vaccinator course</li> <li>Complete the online learning tutorials on the IMAC website</li> <li>Become familiar with the Immunisation Handbook</li> <li>Attend the IMAC in-person tutorial</li> <li>Pass the learning assessment</li> <li>Complete the first aid refresher course (due to certificate expiry date approaching)</li> <li>Complete the first aid vaccination course</li> <li>Complete an independent clinical assessment</li> </ul>	<p>Time and \$</p>	<p>Ideally within 1 year.</p>	<p>March-April 2020</p> <p>Completed IMAC tutorials, attended the in-person tutorial and passed the learning assessment.</p> <p>My progress was delayed due to COVID lockdown and time away from work. I could not book any first aid courses for the remainder of the year.</p> <p>January 2021</p> <p>Completed first aid refresher course.</p>

			<p>April 2021</p> <p>Completed the first aid vaccination course.</p> <p>May</p> <p>Clinical assessment successfully completed and now able to vaccinate.</p>

<b>My development goal</b>			
2. I need to be trained to dispense Thalidomide and Lenalidomide which are commonly dispensed medications at my pharmacy (i-access program)			
<b>How have I identified this area / why is it important (Optional)</b>			
Thalidomide and Lenalidomide are commonly dispensed medications at my pharmacy. It is important I become knowledgeable about these medications in order to clinically screen prescriptions and counsel patients effectively.			
<b>Actions I will take</b> What will I do to develop the behaviour, attitude, knowledge or skill? Consider workplace learning, what coaching might be valuable as well as courses or study	<b>Resources / support</b> What resources will I need to do this? (\$, time, access to other people)	<b>Timescales</b> When do I want to have this done by?	<b>Feedback / comments on progress</b> What progress have I made? You may wish to date these and include any examples from your practice or a reflection on your learning
<ul style="list-style-type: none"> <li>• Read data sheets and consumer medication information leaflets for Thalidomide and Lenalidomide.</li> <li>• Read the pharmacy SOP on dispensing of Thalidomide and Lenalidomide.</li> <li>• Watch the i-access PowerPoint presentation which is presented by my pharmacy manager.</li> <li>• Discuss dispensing procedures with my pharmacy manager and colleagues.</li> <li>• Complete online tutorial on the i-access program (patient verification process).</li> <li>• Become registered with Celgene's risk management programme (i-access) in order to be able to dispense Thalidomide and</li> </ul>	<p>I will need to make time to research information, read resources and complete the online i-access tutorial.</p> <p>I need to organise a meeting with my pharmacy manager to go over the training presentation.</p>	<p>Ideally within 2-3 weeks</p>	<p>August 2020</p> <p>Read all the relevant resources. I became knowledgeable about these two medications and counselling points for patients.</p> <p>Scheduled a meeting with my pharmacy manager to go over the training presentation and we discussed dispensing procedures.</p> <p>I completed the online i-access program tutorial.</p>

Lenalidomide prescriptions.			I successfully registered with the i-access program and started to dispense Thalidomide and Lenalidomide prescriptions from then onwards.
